- Profession:
 - Sr. Business Analyst at Cummins-Meritor in the Aftermarket Division
 - NA Aftermarket Warehouse Operations Qlik Project
- Education:
 - M.S. in Economics, University of Utah, Salt Lake City, UT
 - B.A. in Economics & Management, Wells College, Aurora, NY
- Fast Facts:
 - I'm a working mom.
 - I am currently training for the Flying Pig Marathon in Cincinnati on May 7th.
 - My hobbies include reading, going to festivals, running, weight training, hiking, and taking my kids on adventures.

Introduction

About Cummins-Meritor

In 2022, Cummins acquired Meritor, Inc. Now a business unit within Cummins' Components segment, **Cummins-Meritor** is a global supplier of axles, brakes, suspensions, drivelines and aftermarket parts for the commercial vehicle and industrial markets.

Introduction

Cummins-Meritor Product Portfolio

Truck

- Axles
- Drivelines, universal joints and yokes
- Cam, air and hydraulic brakes
- Automatic slack adjusters

Trailer

- Axles
- Air ride suspensions
- Meritor Tire Inflation System™ (MTIS)
- Brakes

Defense

- Full portfolio of axle and brake technology
- All-wheel drive systems
- Independent suspension axle systems (ISAS)
- Military-grade drive axles
- Transfer cases

Off-Highway

- Heavy-duty front and rear axles
- All-wheel drive systems
- Transfer cases
- RT crane axles

Specialty

- Front and rear axles
- All-wheel drive systems
- Transfer cases
- Gearboxes
- PTOs

Aftermarket

- Original equipment service parts
- All-makes programs
- Remanufactured parts

Background

- Centralized self-service *Data & Analytics* using Qlik Sense.
 - More than 650 users
 - 120 dashboards created by 40 plus developers
- Cummins-Meritor Aftermarket Operations Warehouse – Qlik Analytics Project
 - Prior to Qlik:
 - Data was difficult to access
 - Used legacy reporting software
 - Extracting data & metrics took hours
 - Some metrics were not possible to calculate (dock to stock)
 - With Qlik:
 - Easily accessible
 - Updated bi-hourly
 - Increased efficiency in reporting
 - Increased efficiency for labor management
 - Insight into where to prioritize efficiency projects

Receiving (REC)

Functional Areas

- Receiving Product
- Returns (RGNs)
- Initial Quality Inspections
- Space Utilization

Work Areas

- Operate two docks (Front & Back)
 - Total of 12 doors
- Quality Inspection Area
- Return Inspection Area

Employees	Shifts	Daily Lines Processed	Annual Lines Processed	Annual Shipments Received

Meritor NA Aftermarket Operations Overview

Project Process

- Project kickoff
 - identifying contacts/internal customers
 - research & interviewing to understand current process, business needs, metrics, and identify/prioritize projects
- Work with internal resources including IT, Data & analytics, Kronos
- Testing & User Acceptance
 - Validating data
 - Testing impact on production servers of hourly & bi-hourly data loads
- Build Qlik Apps using data load editor
- Training for managers, operational leads, & team leads
- Agile Sprints
 - Iterative updates of Qlik apps for continuous improvement using User Stories (as a..., I want..., so that...)
- Future Projects

Picks – COPS Operations NA Aftermarket

- Provides picking transactional data for the Customer Operations (COPS) department
 - Operation leads use the picks app for metrics and labor management including:
 - # of picks transaction, pick types, location, equipment type
 - Overtime needs, how shifts are doing current, weekly, monthly, manage employees, lead employee reviews
- Qlik significantly reduced time to pull data & metrics for the Operation Leads & managers
- Quality manager uses the app to determine # of picks per user compared to the errors report
- 15 unique users with over 350 sessions in the past month and steady growth in usage

On Time Shipping

- Able to check customer order lines and prioritize work based on hourly data where as prior manual update of report took time/effort
- Increased quality of shipping customer orders on time / reduced past due shipments
- Prioritization of work for shipping customer orders
- Easy tool to open & see visibly what needs to get out the door each day
- Positively impacts customer order misses & fill rate
- Based on shift, use case is different:
 - 1st shift: prioritize picking and prepping shipments
 - 2nd shift: prioritize orders to ship
- 12 unique users & 157 sessions after being published in the past month
